QR PROFILE

PROFESSIONAL SUMMARY

Fourth-year Bachelor of Science in Information Technology student with hands-on experience developing web and mobile application projects, working with databases, testing application features, and troubleshooting technical issues. Building QwerNFC, a future technology business focused on application and web solutions, database-backed services, and NFC products. Brings three years of customer-facing work experience, with strengths in communication, teamwork, adaptability, and handling day-to-day responsibilities.

TECHNICAL SKILLS

Programming: Python, JavaScript, Java, PHP, SQL
Web and application development: Full-stack project development (front end and back end), HTML5, CSS3, JavaScript, Flask, Capacitor, responsive web development, mobile application development
Databases and backend: SQLite, PostgreSQL, relational database concepts, CRUD operations, database connectivity, API integration
Tools and platforms: Visual Studio Code, Git, GitHub, PowerShell, Cloudflare Workers, Render
AI-assisted development: AI coding assistants, prompt-based workflows, Python automation, model selection and cooldown-aware routing
Workplace and administrative: Basic data entry, record keeping, document organization, spreadsheet updates, and accurate information checking
Productivity and communication: Document preparation, email communication, online research, presentations, and digital collaboration
Work habits: Organization, time management, task prioritization, attention to detail, adaptability, problem-solving, and following procedures
Teamwork and service: Clear written and verbal communication, customer service, teamwork, professionalism, and willingness to learn new systems

TECHNICAL CAPABILITIES

- Develop and maintain web pages and application features using HTML, CSS, JavaScript, Python, PHP, and Java.
- Work with relational databases, write SQL queries, and implement CRUD operations using SQLite and PostgreSQL.
- Connect application features to backend services and APIs; work with JSON data and database connectivity.
- Test application workflows, investigate bugs, troubleshoot errors, and verify fixes across devices and screen orientations.
- Use Git and GitHub for source control, work in Visual Studio Code and PowerShell, and support application deployment to cloud platforms.
- Use AI coding assistants and Python automation to support development tasks, compare model options, and manage usage cooldowns.

SELECTED PROJECTS

QwerNFC | Technology business initiative

- Developing a future technology business focused on application and web development, database-backed services, and NFC products.
- Product concepts include GReview, TimeCapsule, QwerNFC Music, Live Memories, and QyorFoundMe. Live Memories connects NFC/QR keychains with digital photo galleries; QyorFoundMe is a QR-based lost-and-found concept with offline-readable contact details and an online recovery page.
- Worked on mobile application workflows involving QR scanning, camera integration, PIN-based security, gallery features, identity and event management, and cloud synchronization; tested camera behavior and investigated rotation issues.

Nexora | Python / Flask web application

- Worked on authentication, role-based access for administrators, students, and supervisors, dashboards, user management, and SQLite/PostgreSQL database configurations.

AI Model Rotation Utility | Python automation

- Created a Python utility that selects AI coding models by task, tracks cooldown periods, and switches to available models when usage limits are reached; wrote automated tests.

EXPERIENCE

ICT Field Application / Service | Research Resource Center, Rizal High School | April 2023

- Applied ICT skills while providing service at the Research Resource Center; recognized for valuable service and good conduct.

Big Brew Milkteashop | Customer-facing service role | 3 years

- Assisted customers in a fast-paced service environment, listened to requests, and communicated order information clearly.
- Coordinated with coworkers to support daily operations and maintain a helpful, professional customer experience.
- Developed communication, teamwork, reliability, adaptability, and time-management skills.

EDUCATION

Arellano University – Andres Bonifacio Campus

Bachelor of Science in Information Technology | Fourth-Year Student
Required On-the-Job Training: 486 hours

Additional strengths: Data accuracy, organization, record keeping, task follow-up, customer service, communication, teamwork, adaptability, and attention to detail.

CERTIFICATIONS & TRAINING

Computer Systems Servicing (CSS) NC II Training | 280 hours | MindTech / TESDA | Completed August 2023
Joint Delivery Voucher Program (JDVP), CSS NC II | Certificate of Participation | June 2023
